

Aidan Andrew Daniel

Passionate about infrastructure and network engineering, I'm pursuing a Bachelor of Computer Science (Networks & Security) at UTM. With Cisco certifications and hands-on experience to network operations such as switching, routing and network configuration. I aim to grow into a cybersecurity professional role focused on securing networks, protecting digital infrastructure, and strengthening organizational security systems.

Work Experience

Software Tester Intern - AmBank (M) Berhad

Oct 2025 - Feb 2026

- Performed User Acceptance Testing (UAT), regression, sanity, and back-testing for AmBank's digital banking platform (AmOnline)
- Logged, documented, and tracked defects using OpenText ALM
- Verified content accuracy such as translations, localization files, and system configurations across web and mobile platforms
- Collaborated with Business Analysts, Test Managers, Assistant Managers, and external vendors
- Followed detailed testing guidelines, test plans, and compliance standards in a highly regulated banking environment

Projects (Selected)

Blockchain-Powered Investment Tracking System

Apr 2026 - Present | Smart Contract Development, Full-Stack Web Development, Relational Database Design

- Built secure Smart Contracts (Solidity/Hardhat) to permanently ledger investment records and approvals
- Developed a robust REST API (Laravel 11) to handle off-chain metadata, authentication, and rapid caching
- Designed the full system architecture and database schema for the hybrid blockchain solution

Cloud Resume Challenge

May 2026 - Jun 2026 | Cloud Architecture, Infrastructure as Code (Terraform), CI/CD Pipeline Automation, Serverless Computing

- Designed and deployed a full-stack, serverless cloud architecture on Microsoft Azure following DevOps and Infrastructure as Code (IaC) best practices
- Built a responsive, semantic HTML/CSS web application hosted and delivered globally via Azure Static Web Apps
- Engineered two distinct GitHub Actions workflows to automate testing, Python dependency packaging, and secure deployments

Educational Background

Bachelor in Computer Science (Computer Network and Security) with Honours.

Universiti Teknologi Malaysia (UTM)

Oct 2022 - Present

- Current CGPA : 3.77
- Athletics team of UTM

Skills

Technical Skills

- Cloud Platforms: Microsoft Azure (Static Web Apps , Functions , Cosmos DB , App Insights) , AWS (Foundational knowledge)
- DevOps & Infrastructure as Code (IaC): Terraform , Git/GitHub , GitHub Actions CI/CD
- Networking & Security: Routing & Switching (CCNA) , Network Automation (DevNet)
- Databases: Azure Cosmos DB (NoSQL) , MySQL (Relational)
- Languages: Python, Java, C++, C, JavaScript, PHP
- Programming & Scripting: Python , Bash , JavaScript , PHP/Laravel 11 , Solidity , Java , C/C++

Languages

- English (Fluent)
- Malay (Native)

Certification

- CCNA: Introduction to networks
- CCNA: Switching, Routing, and Wireless Essentials
- CCNA: Enterprise Networking, Security and Automation.
- DevNet Associate

Additional Information

- Student-Athlete
- Bronze medalist for athletic(400m hurdle) of SUKIPT 2024
- Sabah athlete for SUKMA 2024
